For 55" TVs 3.5~4m (11~13 feet)

Rear Speakers ⓈⓁ ⓈⓇ

• Place these speakers behind your listening position.
• If there isn't enough room, place these speakers so they face each other.
• Place them about 60 to 90cm (2 to 3feet) above your ear, facing slightly downward.

Connecting the Video Out to TV

Choose one of the two methods for connecting to a TV.

Resetting Wireless Communication

Reset the system if a communication failure occurs, or if the Link indicator (blue LED) on the wireless receiver does not light up and the "REAR CHK" message blinks on the main unit's display.
Reset the system while the main unit and the wireless receiver module (SWA-3000) are in Power Standby mode.

1 With the main unit turned off, press and hold the remote control's **REMAIN** button for 5 seconds.
- Press the button until the POWER(⏻) indicator lights up blue. (The indicator will turn off in 1 second.)

2 With the wireless receiver module turned on, use a ball point pen or a pair of tweezers to press the **RESET** button on the back of the unit.
- The Standby/On LED on the front panel of the wireless receiver module blinks 2 times.

RESET

WIRELESS RECEIVER MODULE

3 Turn on the main unit.
- The Link LED of the wireless receiver module is lit and the setup is finished.
- If Power Standby mode continues, repeat Steps 1 to 3 above.
Caution

- When the wireless receiving module setting is complete, no audio signal is output from the Rear Speaker OUT ports on the back of the main unit.
- The wireless receiving antenna is built into the wireless receiver module. Keep the unit away from water and moisture.
- For optimal listening performance, make sure that the area around the wireless receiver module location is clear of any obstructions.
- Sound will be heard from the wireless rear speakers in DVD 5.1-CH or Dolby Pro Logic II mode only.
- In 2-CH mode, no sound will be heard from the wireless rear speakers.

Note

- Place the wireless receiver module at the rear of the listening position. If the wireless receiver module is too close to the main unit, some sound interruption may be heard due to interference.
- If you use a device such as a microwave oven, wireless LAN Card, Bluetooth equipment, or any other device that uses the same frequency (2.4GHz) near the system, some sound interruption may be heard due to interference.
- The transmission distance of radio wave is about 33 feet, but may vary depending on your operating environment.
  If a steel-concrete wall or metallic wall is between the main unit and the wireless receiver module, the system may not operate at all, because the radio wave cannot penetrate metal.
